Profile

Full-stack engineer with 8+ years shipping production software, currently an Engineering Manager who gets into the mud. I've taken products from zero to one as a founder, and spent the last few years owning features on live platforms used across 1,500+ studios in 24 countries: from data model and API to UI, instrumentation, and the A/B test that proves it worked. Most recently I've been building things agents actually use: a production RAG pipeline consumed programmatically, and an agentic SDLC workflow that changed how my teams ship.

Professional Experience

Engineering Manager

Outliant (now part of Ignite) - *Remote | Sep 2025 – Present*

- Built a production RAG pipeline on AWS Bedrock and Pinecone that turns a sales brief into a structured proposal.
- Owned its retrieval strategy, prompt architecture and API surface; consumed programmatically, not via a chat box.
- Designed an agentic SDLC workflow: per-flow skills, a clarification session, spec approval and guardrails.
- Kept engineers accountable for every AI-assisted change through human spec approval and code review.
- Lead 5–6 concurrent product teams for FitTech enterprise clients, hands-on in architecture and code review.
- Introduced a Backstage-based project bootstrap system, increasing new-project setup speed by 25%.
- Rolled out SOPs, Git standards and technical specs org-wide: fewer hotfixes, 40% better cross-team communication.

Tech Lead & Senior Full-Stack Engineer

Outliant (now part of Ignite) - *Remote | Feb 2024 – Sep 2025*

- Consolidated two legacy Orangetheory platforms into one CMS, cutting over a live product used by 1,500+ studios.
- Built an analytics event pipeline (Snowplow, Snowflake, AWS) whose data drove a 20% Q4 2024 revenue increase.
- Ran the A/B testing program (VWO) across core conversion flows: +30% engagement and sales in 3 months.
- Built a shared React + Webflow component library for Orangetheory and Anytime Fitness, cutting build and QA time.
- Led the JavaScript to TypeScript migration with unit testing, and raised accessibility coverage by 70%.
- Rebuilt Barry's, Anytime Fitness, Perspire and The Broken Yolk Cafe on Webflow CMS that marketing runs alone.

Senior Full-Stack Engineer

Outliant (now part of Ignite) - *Remote | Aug 2023 – Feb 2024*

- Shipped Apply Promo end to end (data model, API, React UI, tests): +60% campaign conversions.
- Removed steps from payment flows based on analytics and UX review: +25% conversions in one month.
- Took Lighthouse scores from 50–60% to 80–99% across Performance, Accessibility, and SEO.

Founder & CTO

Lograf Design & eCommerce - *Montevideo, Uruguay | Mar 2020 – Mar 2023*

- Built and sold an eCommerce product from zero (Node.js, PostgreSQL, React, MercadoPago), running in 30+ stores.
- Lifted client sales by up to 80%, grew the brand to 50k+ social followers and cut client hosting costs by 95%.

Lead Frontend Engineer

Serraform Streaming - *Remote | Nov 2022 – May 2023*

- Led a 4-person team shipping a web3 streaming rental app for Decentraland in 5 months.
- Integrated Polygon smart contracts, wallet UX and Livepeer live streams into the React front end.

Full-Stack Engineer

SpaceDEV - *Montevideo, Uruguay | Sep 2018 – Mar 2020*

- Built a private chat and document-sharing app for doctors collaborating on shared patients.
- Built an AI-assisted social media analytics dashboard; improved the SomosUY mobile app experience.

Education

Software Engineering

Universidad ORT Uruguay - *Montevideo, Uruguay*

Technical Skills

Product: TypeScript, React, Next.js, Vite, Redux, React Query, Zustand, Node.js, NestJS, Python, REST, GraphQL
Data: PostgreSQL, Prisma, SQL, MongoDB, Snowplow, Snowflake
AI & Agents: Agentic workflows, RAG, Pinecone, Claude API, AWS Bedrock, Evals, Claude Code, Cursor
Infra: AWS, AWS CDK, Docker, GitHub Actions, CI/CD, Vercel, Webflow
Product craft: A/B testing (VWO), analytics instrumentation, performance, accessibility (WCAG), design systems

Languages & Interests

Languages: Spanish (native), English (advanced / professional, written and spoken)
Outside of work: Running, tennis, volleyball, playing the guitar, cooking, reading
